EREBUS

Data crypted

Every important file (documents, photos, videos etc) on this computer has been encrypted using an unique key for this computer. It is impossible to recover your files without this key. You can try to open them they won't work and will stay that way.

That is, unless you buy a decryption key and decrypt your files.

Click 'recover my files' below to go to the website allowing you to buy the key.

From now on you have 96 hours to recover the key after this time it will be deleted and your files will stay unusable forever

Your id is : " you can find this page on your desktop and document folder Use it to

if the button below doesn't work you need to download a web browser called 'tor browser'

download by clicking [here](#) then install the browser, it's like chrome, firefox or internet explorer except it allows you to browse to special websites. once it's launched browse to <http://erebus5743lnq6db.onion>

Recover my files

Crypted Files :

**SF metro rail system: Criminal asking 100 Bitcoins ... 4 year old Java vulnerability
Hosting company Nayana (South Korea) ... over 1 million US \$ paid**

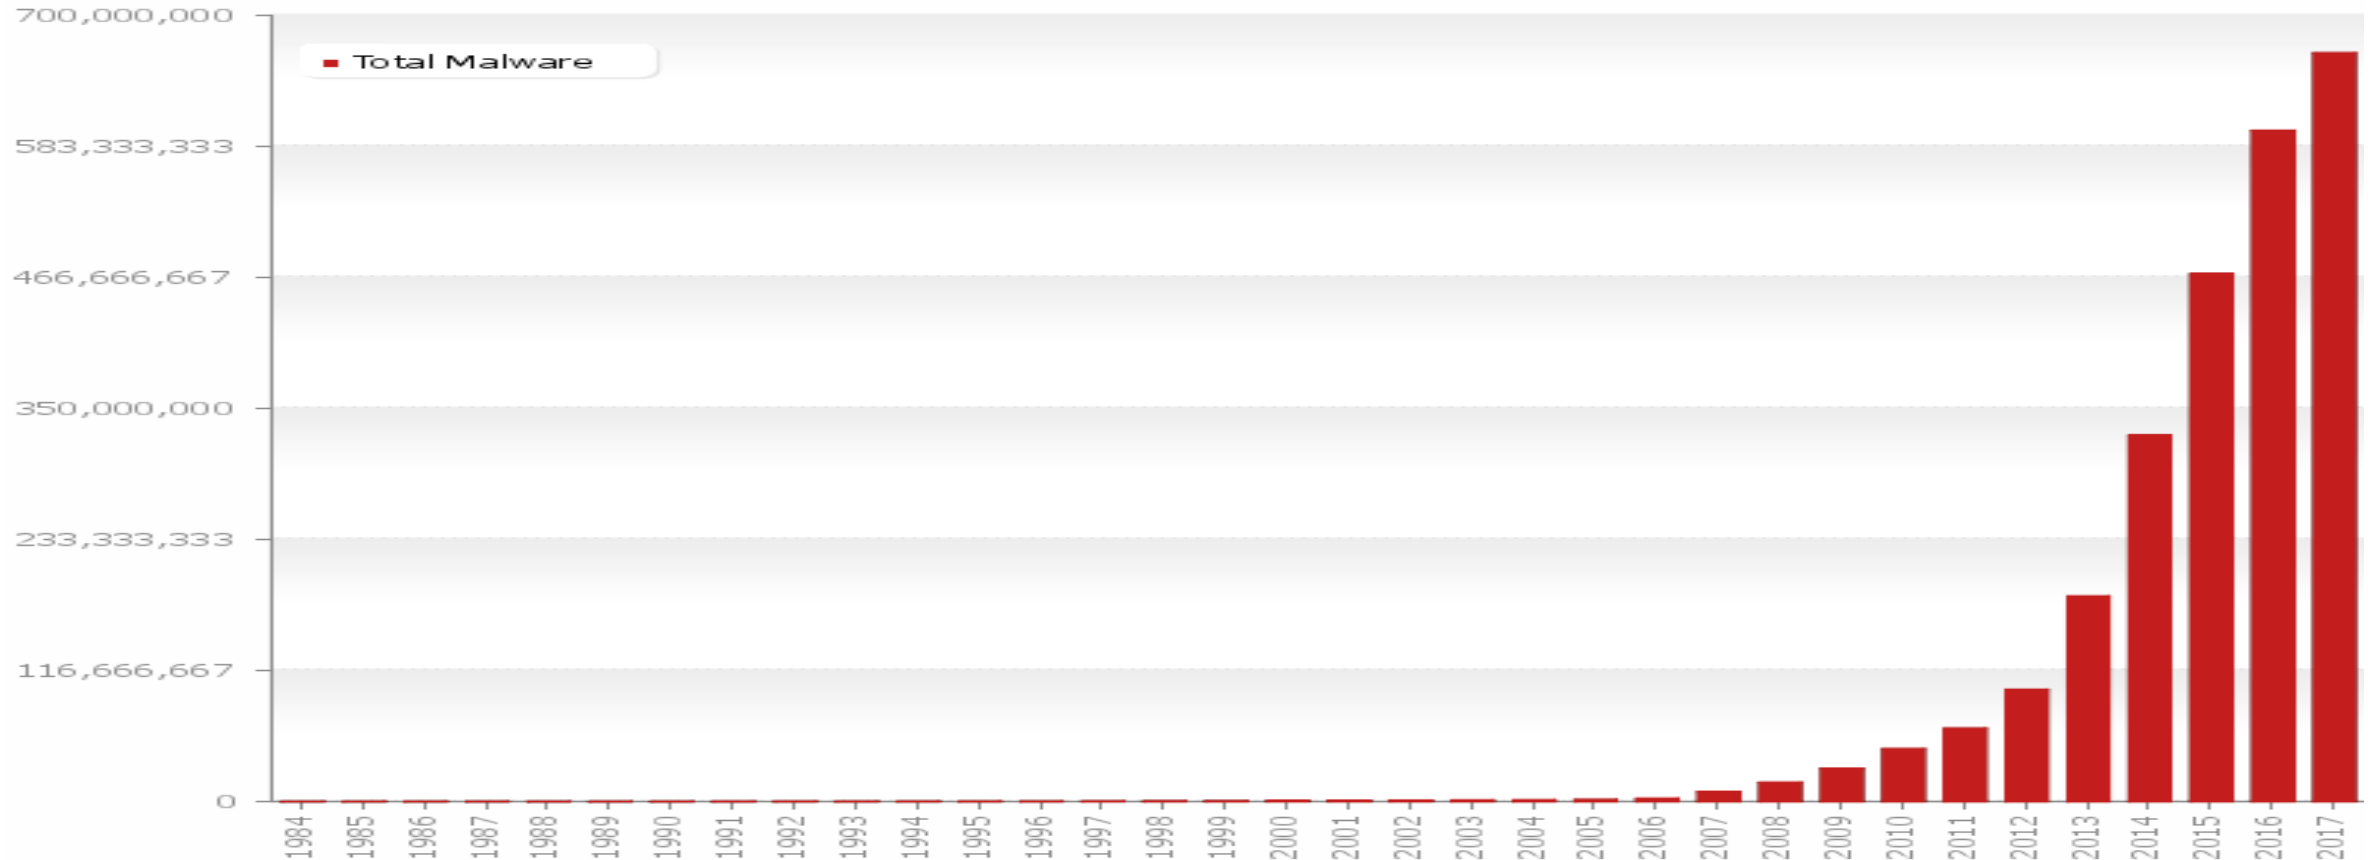

MEMORIES

AIDS INFORMATION DISKETTE

- 1989 PC Cyborg Corporation, Joseph L. Popp
- Diskette with AIDS Information given at WHO-Conference
- Over 20.000 copies via PC World magazine
- Encrypts HD after some reboots
- Asked \$189 ransom to pay to P.O.Box in Panama
- One of the first to decrypt/solution

SPAMMING MAILS WITH DOCS, ZIP, JAVACRIPT, ETC...

The screenshot shows an email client window titled "Invoice - Message (Plain Text)". The interface includes a ribbon with "FILE" and "MESSAGE" tabs. The "MESSAGE" tab contains various actions: Delete, Respond (Reply, Reply All, Forward), Quick Steps (Create New), Move, Tags (Mark Unread, Categorize, Follow Up), Editing (Translate), and Zoom. The email header shows the sender as Barrett Gallagher <GallagherBarrett631@airtelbroadband.in> with the subject "Invoice". The recipient list is empty. An attachment bar shows a document icon and the text "Invoice74531951.doc (44 KB)". The email body contains the following text:

Dear Sir/Madam,

I trust this email finds you well,

Please see attached file regarding clients recent bill. Should you need further assistances lease feel free to email us.

Best Regards,

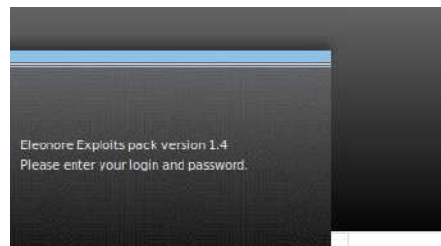

Barrett Gallagher

ANONYMIZE
BITCOIN

BITCOIN MIXER

... the perfect bitcoin mixing service...

Powerful tools to launder your bitcoins.

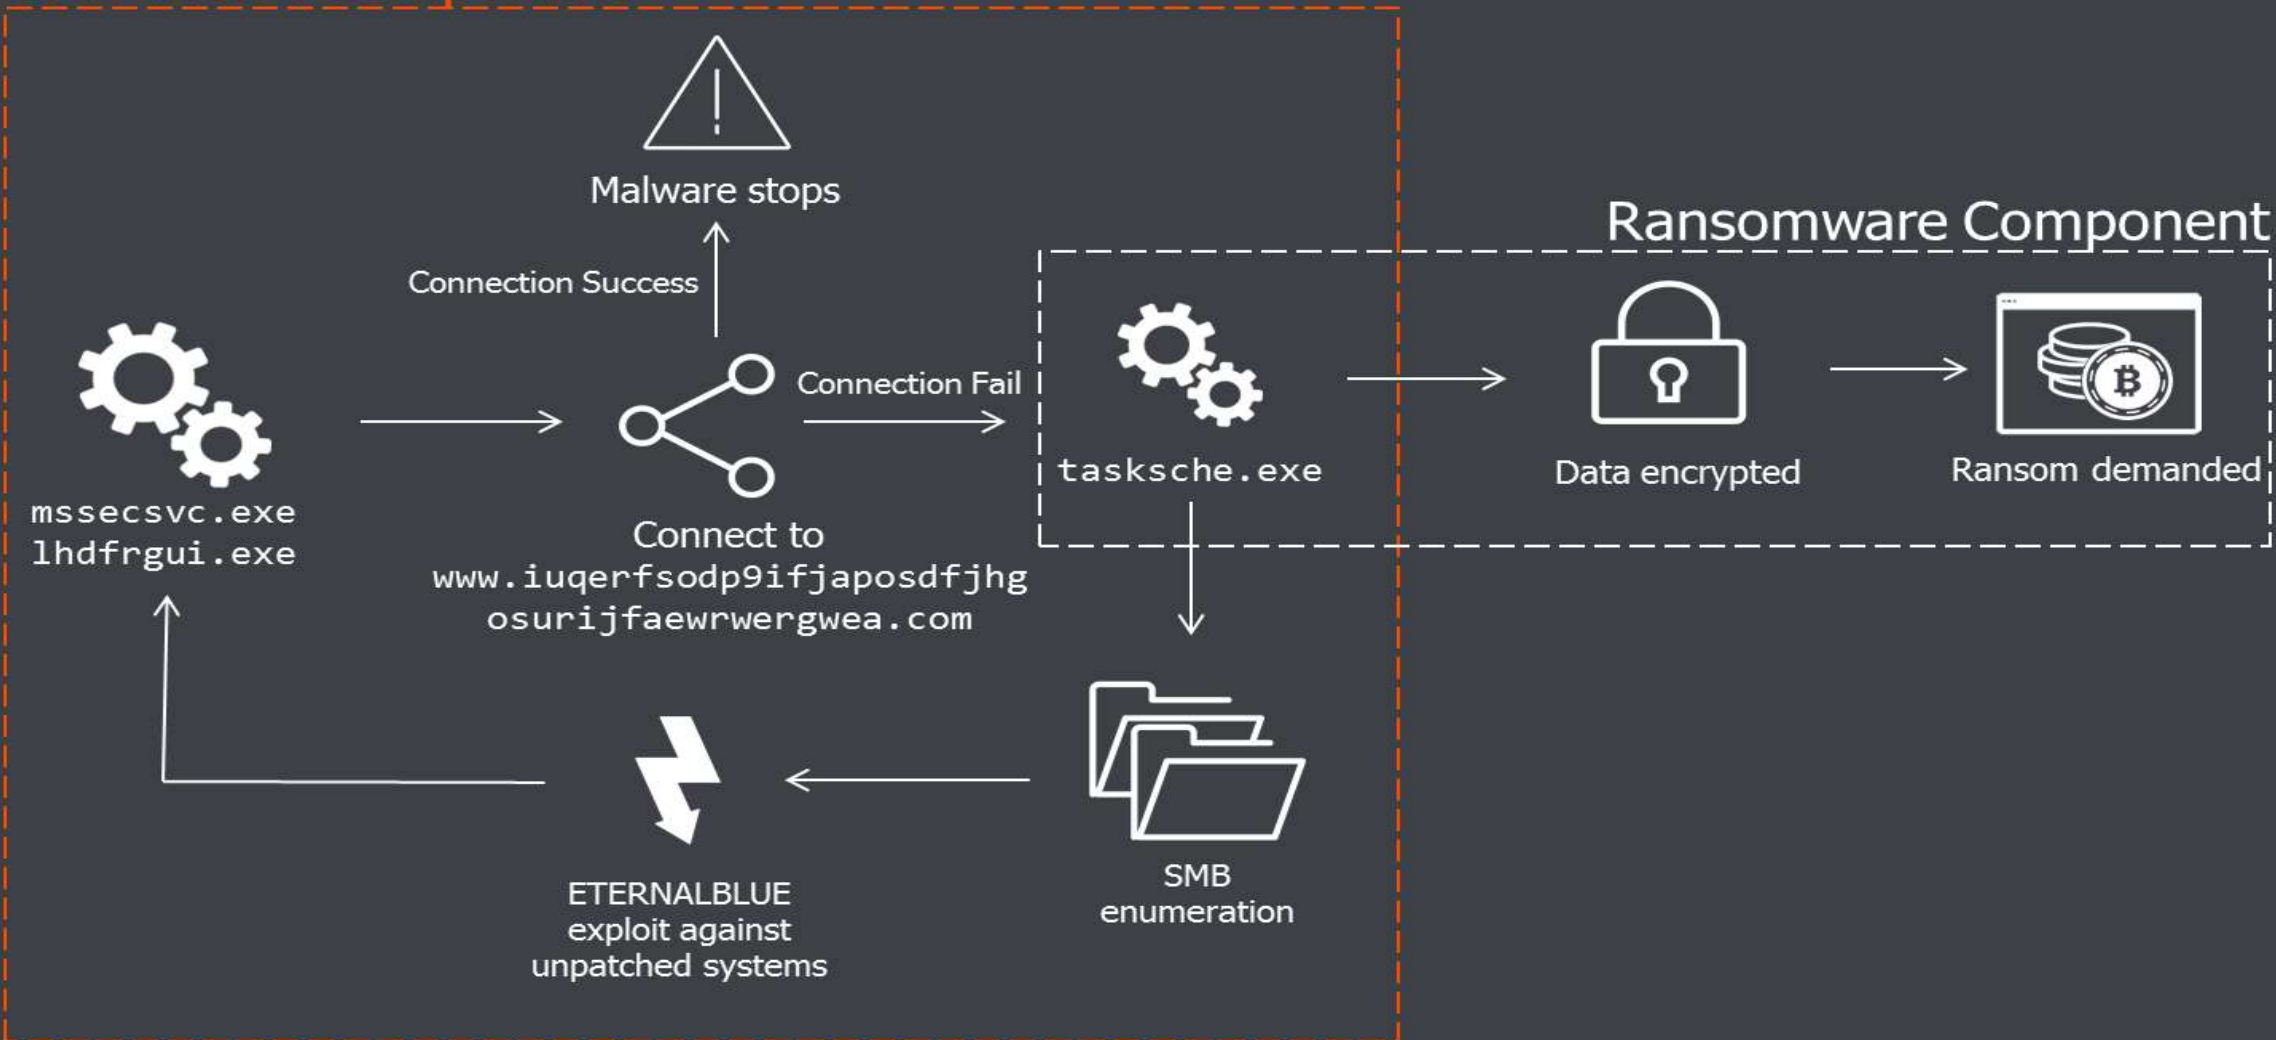

Our bitcoin mixing service will fully anonymize bitcoin.

WHY IS RANSOMWARE SO DIFFICULT TO DETECT?

- It features built-in traffic anonymizers, like **TOR** and **Bitcoin**, to avoid tracking by law enforcement agencies and to receive ransom payments
- **Communication** with CC servers is **encrypted** and difficult to detect in network traffic
- It uses **anti-sandboxing mechanisms** so that antivirus analyzing techniques won't pick it up
- It employs **domain shadowing** to conceal exploits and hide the communication between the downloader (payload) and the servers controlled by cyber criminals (where the ransomware is stored)
- It features **Fast Flux**, another technique used to keep the source of the infection anonymous (swap the IP addresses constantly and with high frequency by changing DNS records, so that automated analysis mechanisms cannot detect the real source of the infection)
- It deploys **encrypted payloads** which can make it more difficult for antivirus to see that they include malware
- It has **polymorphic behavior** that endows the ransomware with the ability to mutate
- It has **the ability to remain dormant**

KERANGER RANSOMWARE

The image is a screenshot of the Transmission website. At the top, there is a browser address bar showing "https://www.transmissionbt.com". Below the address bar is a red banner with the word "TRANSMISSION" in large white letters, followed by the tagline "A Fast, Easy, and Free BitTorrent Client". To the right of the text is a 3D-style icon of a silver square button with a red pusher and a downward-pointing arrow. Below the banner is a navigation menu with links: MAIN, ABOUT, DOWNLOAD, DEVELOPMENT, ADD-ONS, CONTENT, and SUPPORT. The main content area features a "Feature Spotlight" section with a list of bullet points. To the left of this section is a box for "Transmission 2.90" with links for "Download Now", "Release Notes", and "Previous Releases". At the bottom of the page is a dark red footer containing a PayPal logo, the text "Donate to Transmission", copyright information for the Transmission Project (2005-2016), design credits to Stranded Design and Boolable, and a logo for CodeFly with the text "Bandwidth provided by".

[How to buy bitcoins?](#)
[Contact Us](#)

What Happened to My Computer?
Your important files are encrypted.
Many of your documents, photos, videos, databases and other files are no longer accessible because they have been encrypted. Maybe you are busy looking for a way to recover your files, but do not waste your time. Nobody can recover your files without our decryption service.

Can I Recover My Files?
Sure. We guarantee that you can recover all your files safely and easily. But you have not so enough time.
You can decrypt some of your files for free. Try now by clicking <Decrypt>. But if you want to decrypt all your files, you need to pay.
You only have 3 days to submit the payment. After that the price will be doubled. Also, if you don't pay in 7 days, you won't be able to recover your files forever. We will have free events for users who are so poor that they couldn't pay in 6 months.

How Do I Pay?
Payment is accepted in Bitcoin only. For more information, click <About bitcoin>. Please check the current price of Bitcoin and buy some bitcoins. For more information, click <How to buy bitcoins>. And send the correct amount to the address specified in this window. After your payment, click <Check Payment>. Best time to check: 9:00am - 11:00am GMT from Monday to Friday.

Send \$600 worth of bitcoin to this address:
 **bitcoin**

REMEDICATION

**TO PAY
OR
NOT TO PAY?**

REMEDIATION = KNOWN TECHNIQUES

- Security package (Endpoint Protection) installed on every system
- Activate or use behavior protection and exploit protection
- Patch Management (PASAP = Patch ASAP)
- Backups (external and not always connected drives)
- Only admin rights for certain users
- Limit user rights on shares or in-the-cloud
- Disable macro's where not used!
- Mailgateway: filter out all executables (eg. .exe .com .js .htm .scr ...etc)
- Mailgateway: use your own filepassing method (eg. zip with specific password)

A top-down view of four hands building a circular wall of wooden blocks on a dark wooden surface. The hands are positioned at the top-left, top-right, bottom-left, and bottom-right corners, each holding a block to complete the circle. The background is a dark, textured wooden surface. The text is overlaid in the center in a bold, red, sans-serif font.

NEED HELP unlocking your digital life
without paying your attackers*?

YES

NO

Ransomware is malware that locks your computer and mobile devices or encrypts your electronic files. When this happens, you can't get to the data unless you pay a ransom. However this is not guaranteed and you should never pay!
